# MATERIAL SPECIFICATIONS BINDEX<sup>™</sup> BFM

# <u>Materials:</u>

Natural Wood Fibers (including Curlex<sup>®</sup> Fibers) High Grade Organic Tackifier Cross-Linked Binder Green Dye

## **Description:**

Bindex BFM is a hydraulically applied bonded fiber matrix (BFM) providing an organic cover to protect seeds, enhance germination, and hasten re-vegetation when mixed with water and applied with hydraulic mulching equipment. Bindex BFM is a blend of natural wood fibers (including Curlex Fibers), high grade organic tackifier, cross-linked binder, and green dye. Bindex BFM is available palletized in bags for applicator convenience. Bindex BFM shall be manufactured in the U.S.A.

Bindex BFM has a design soil loss ratio (event-based RUSLE C factor) of  $\leq 0.10$  and is typically suitable for slopes up to 1H:1V. Bindex BFM improves germination by  $\geq 300\%$  (ASTM D 7322).
