

Curlex® All Natural Biodegradable Packaging Pads

American
Excelsior
Company®
Wood Fibers Division

Wood Fibers

In today's world, it is almost impossible to satisfy the environmental needs of a packaging product and still provide the protection you need to assure that your shipment arrives undamaged. Curlex Packaging Pads manufactured by American Excelsior Company may be the answer you've been looking for.

(cutaway view of pad)

Curlex pads contain 100% all natural Aspen excelsior wood fibers which are manufactured from renewable Aspen trees, and due to a special cutting process, each fiber contains small "barbs" to help the fiber interlock with each other, to provide a uniform pad. In addition, excelsior fibers are very resilient and can help protect products from vibration and handling during shipment or simply act as an "all natural" void-filler for your carton.

To help reduce the transportation costs to your location, the pads are shipped in compressed bundles. All you'll need to do is release the banding wrap and give each pad a quick "refreshing snap" and you are ready to give your package 100% environmental protection. Standard stock sizes* include:

14" x 24"
14" x 36"
24" x 24"

If your products require added protection or may need a special size, Curlex Packaging Pads can also be made in a wide variety of thicknesses and sizes. Other sizes available upon request with minimum order quantities.

For more information about Curlex Packaging Pads, visit our website at www.americanexcelsior.com or call: (866) 934-2377.

*Sizes based on actual overall paper size of pad.
Check with local office to make sure your product selection meets the needs of your application.
