#### **Description:**

Curlex III FibreNet erosion control blanket (ECB) is a natural, stitched excelsior blanket with 100% biodegradable jute netting that provides a temporary organic cover to reduce erosion, protect seeds, enhance germination, and hasten re-vegetation. Product is 100% biodegradable when biodegradable thread is ordered. Curlex III FibreNet is furnished in rolls with polyethylene wrapping to protect against the elements prior to installation, and may be ordered in Master-Paks of fifteen rolls banded together to minimize material handling requirements. Curlex III FibreNet is also available as QuickGRASS (green pigment). Curlex III FibreNet shall be manufactured in the U.S.A.

Curlex III FibreNet has a design soil loss ratio (event-based RUSLE C factor) of .022 and is typically suitable for slopes up to 1H:1V. Curlex III FibreNet is rated for channel flows up to 10.0 ft/s (3.1 m/s) and 2.5 lb/ft<sup>2</sup> (120 Pa) shear stress.
