Description:

Curlex High Velocity erosion control blanket (ECB) is a natural, stitched excelsior blanket that provides a temporary organic cover to reduce erosion, protect seeds, enhance germination, and hasten re-vegetation. Curlex High Velocity is furnished in rolls with polyethylene wrapping to protect against the elements prior to installation, and may be ordered in Master-Paks of fifteen rolls banded together to minimize material handling requirements. Curlex High Velocity is also available as QuickGRASS (green pigment). Curlex High Velocity shall be manufactured in the U.S.A.

Curlex High Velocity has a design soil loss ratio (event-based RUSLE C factor) of .022 and is typically suitable for slopes up to .75H:1V. Curlex High Velocity is rated for channel flows up to 11.0 ft/s (3.4 m/s) and 3.25 lb/ft^2 (156 Pa) shear stress.
