IN EROSION CONTROL

Curlex® III - Long-Term Natural Protection for Waterway

Curlex III Installation

One Year Later

Not all long-term temporary erosion control blankets are created equally. Curlex III was chosen to protect the nearby waterway from erosion. Curlex III provides up to 36 months of protection. That level of performance ensures that vegetation has a chance to fully establish. All Curlex products are made in the USA using only sustainably harvested, naturally seed-free Great Lakes Aspen excelsior fibers. Questions? Give us a call. We can help.
