THE MOST TRUSTED NAME
IN EROSION CONTROL

Curlex® Sediment Log®

Naturally Protecting Water Resources
from Contaminated Runoff

Day of
Installation

Two Months
Later

Curlex Sediment Logs were chosen for this environmentally sensitive highway project. Porous Curlex Sediment Logs are engineered to both dissipate velocity and filter contaminated runoff before it discharges to precious water resources. Curlex Sediment Logs were installed along with Curlex erosion control blankets on this project. Both of these excelsior based products are made from sustainably harvested Great Lakes Aspen and are naturally seed free.
