

American
Excelsior
Company®

THE MOST TRUSTED NAME
IN EROSION CONTROL

Recyclex® TRM-V

Building the Best Vegetated Channels to
Protect Fly Ash Landfills

Day of Install

11 Months Later

American Excelsior's Recyclex TRM-V Turf Reinforcement Mats were chosen to protect these vegetated waterways at a fly ash landfill. With a specific gravity greater than one, Recyclex TRM-V will not float during hydraulic events unlike other TRMs. Recyclex TRM-V maintains intimate contact with the soil and seed-bed, while providing the ideal environment to hastened re-vegetation. Benefits of vegetated waterways are well documented and include cooler discharges, better water filtration, and infiltration and lower cost of installation. For additional information on our full line of Turf Reinforcement Mats visit us at
