

QuickGRASS® Pro

Turf Starter Blanket

American Excelsior Company is the inventor of biodegradable erosion control blankets. While this unique product, branded under the name Curlex®, was developed for large construction and highway projects, it is now available under the brand name of QuickGRASS® Pro to retailers and landscape contractors. Since the recent enactment of Phase II of the Clean Water Act, many municipalities have written Curlex® / QuickGRASS Pro into their building codes. Phase II affects small construction sites of just one acre or greater in size, impacting home builders and contractors.

Features

- Fast, easy installation
- Superb water retention
- Protects seed from sun's drying heat
- Enhanced grass seed germination
- Protects seed from birds
- Degradable - no need to remove QuickGRASS Pro before mowing
- Barbed fibers help product "cling" to the soil unlike other products
- Complies with storm water management regulations

QuickGRASS Pro comes in Two Sizes

- Large roll is 4 ft. x 100 ft. (stakes not included)
- Small roll is 2.5 ft. x 56 ft. (includes the biodegradable E-Staple® to help anchor the fiber to the soil)
- Note: Grass seeds not included

E-Staples are much more environmentally friendly than metal staples. E-Staples help to minimize the risk of injury to people and equipment. They have superior holding capability, are water resistant, and do not soften from moisture during storage.

For more information about QuickGRASS Pro Erosion Control/Seed Starter Blankets or the new biodegradable E-Staples, visit our website at www.AmericanExcelsior.com, or call toll-free: (888) 352-9582.
