## Elastic Foams

### FEEL the COOL Difference

**A**merican Excelsior Company takes pride in its history of being an Industry leader and innovator of Flexible Foams products, and we are proud to introduce our new line of open-cell, breathable, Viscool™ Elastic Foams.

Viscool Foams were designed and formulated exclusively to meet stringent specifications for improving air flow and enhancing performance and conformability. Its unique cell structure was specifically designed to reduce heat retention which is found in most high density viscoelastic (also known as slow recovery) foams. Viscool allows for increased air flow which provides breathability to reduce heat, moisture retention, and provide optimal cool comfort to the user.

**V**iscool is a perfect choice for applications in seating, support, bracing and offers a soft, comfortable, orthopedic pressure support while providing high energy absorbing impact characteristics. Viscool Foams' air flow testing indicates an improvement of 35-90 times more air flow than other leading manufacturers of high density viscoelastic foams.

Viscool Elastic Foams applications can be found in: seating, bedding, medical, recreational, athletic and many specialty uses and are exclusively available through American Excelsior Company.

# American Excelsior Company

Viscool viscoelastic foam is unique as it is more breathable than most visco foams on the market and in some cases, up to 95% more breathable. What this means is that Viscool provides a "cooler" more comfortable cushion to the user. Some visco foams can retain body heat and can become uncomfortable when being used in a seating or direct contact application.

Viscool can be used in a wide variety of applications including:

**Medical Applications:** Wheelchair cushions, Positioning Pads, Finger Splints, Ear Protection, Strap Padding, EMT Stretchers, Infant Padding, Head Supports and Lumbar Supports.

**Seating:** High-end comfort seats, military, aviation, recreational.

**Sporting Goods/Recreational:** Bench seating, helmets, helmet inserts, shoulder pads, protective vests, body protection.

**Bedding:** Mattresses, cots, bed toppers
