

INTRODUCING

CurlFoam™

Ready to *Spring* into Action for Your Foam Cushioning Needs

CurlFoam is an extruded Polyethylene cushioning product. Its unique cell structure, along with excellent physical properties, makes it the ultimate choice for various cushioning applications.

- CurlFoam's open cell design makes it breathable and ideal for air circulation
- Available in a clear/white color
- Odor-free
- A 100% recyclable product
- Washable
- Does not absorb water and dries quickly
- Mold and mildew resistant

- Products are custom made to meet your requirements, including custom weight firmness and exact dimensions manufactured to your specifications

CurlFoam can be used in a wide-variety of applications, including:

- Seating
- Bedding
- Medical Padding

Contact your American Excelsior Company Sales Representative for more information and to discuss if CurlFoam is the perfect fit for your project.
