- *Novelty Items*
- *High Density*
- *Custom Molded Items*

American Excelsior Company delivers high-quality polyurethane foam molding solutions through advanced, automated manufacturing systems.

Our precision equipment ensures consistent results across a wide range of custom-molded products—including cushioning, packaging, and specialty components.

We work closely with clients to develop tailored solutions, backed by rigorous quality control and testing. Serving industries from automotive and marine to medical and industrial, our automated foam molding process offers efficient, reliable performance at every scale.

Services:

CNC Cutting
Die-Cutting
PVC Coating
PSA Coating
Assembly
Injection Molding
Convoluting
Design and Prototyping

Products:

Flexible Polyurethane
Foams
(Polyether/Polyester), Low
and High Density
Polyethylene Foams,
Crosslink Polyethylene
Foams, Neoprene Foams,
Flotation Foams, Military
Foams, Combustion
Modified Foams, Latex
Foams, Anti-Static Foams,
Foam Flocking,
Reticulated (filter) Foam,
Returnable Dunnage,
Medical Foams

Applications:

Automotive, Furniture,
Bedding, Recreational,
Novelty, Packaging,
Cosmetic, Display, Marine,
Industrial, Gasketing,
Acoustical, Vibration
Control, Protective
Cushioning, Filtering,
Medical, Clothing, Crash
Pads, Mass Transit,
Aviation and Aerospace
